Alert Name	CVSS Score	Reason for Score	Final Priority
Log4Shell Exploit Attempt	9.8	Remote code execution, public exploit available, affects production server	Critical
Phishing Email – Suspicious Link	7.5	Possible credential theft, user interaction required	High
Port Scan Detected	4.3	Reconnaissance activity, no direct impact	Low
	CVSS scores are used to estimate the severity of vulnerabilities.		
	Higher scores indicate higher risk and require faster response.
